

I believe in an America where I still have the right to choose. The purchase of a Satellite Radio receiver is a choice I've made to fill a void for a type of required quality service that I can not get elsewhere. XM Satellite Radio is providing that service. XM provides me with Digital quality Music stations that I can not get elsewhere. The variety is outstanding, and the particular brand/styles/genres of music I listen to can not be found on any land based radio stations. XM Satellite Radio is providing a second to none service that is commercial free, and beloved. Instant Traffic, and Weather, and my type of music broadcast digital, and commercial free are services that I pay for. The National Association of Broadcasters should not be permitted to withhold these services from me because they are incapable of providing them. If other land based radio systems can have weather, and traffic why not this one? Radio is still Radio. It's information, music, whatever. There is no good reason why land based radio should have exclusivity to weather, and traffic. Again, I pay for these quality services, and I urge you to reject the National Association of Broadcasters selfish petition 04-160, and favor XM Satellite Radio's ability to provide the type of quality service that America was built on.
